

EXTENDER PLUG Wiring instruction

This Product need to be wired carefully.

Even though it is similar to wiring up a standard 13 Amps Mains plug, in this case length of the wire that you cut must be more precise otherwise they will cause problem with the mechanism of the plug. Wires must not be cut too long or too short.

Live wire 18 mm , including 6mm Bare copper

Neutral wire 14 mm , including 6mm Bare copper

Earth wire 55 mm , including 6mm Bare copper

You need to ensure you trace the wires as shown above image and away from the parts.

If you cannot close the top you have wired it wrongly and start again.

Ensure there is no loose wire strands when you connect the wires to the plug.
